

Web Designer / Developer Fellowship

Posted: October 29, 2009

Company overview:

Would you like to work at Google someday? Yeah, we would too, but we think we have a similar innovative, casual spirit right here in St. Louis at Amp Technology, the home of Fpweb.net. We are pioneers in SharePoint hosting and are currently hunting for a talented CIS/MIS student to serve as a Web Developer Fellow. For more information about our company, check out www.fpweb.net.

Fellowship overview:

The Web Developer Fellow will be responsible for helping develop and maintain public Websites as well as various internal applications. Experience in constructing wireframes, Website layouts and/or application interface prototypes using (x) HTML and CSS is required. Experience with jQuery or server-side scripting and programming is a plus. This is your chance to get in with a fast-growing, fast-paced company at the ground level right here in St. Louis. We will hand-pick only the best Fellows to be considered for full time employment at the conclusion of the Fellowship.

Top 10 reasons you want to join our team:

1. Our mission is to be the #1 place to work in St. Louis.
2. We enjoy a casual, necktie-free, friendly collaborative environment.
3. Values matter to us.
4. Rules and bureaucracy annoy us.
5. We pay well.
6. We hire outstanding *people* who also happen to be extremely talented.
7. We embrace innovation and creativity.
8. We constantly solicit, reward and implement great ideas from everyone on our team.
9. We are a small shop with huge ideas; you'll actually have a say in how things are done.
10. Our tireless ambition to dominate our industry means the sky is the limit for you.

This opportunity is for you if:

- You can think "outside the box" to find unique solutions.
- You can produce A-level work with minimum supervision.
- You are hungry to learn from other great developers and designers.
- You are a Web junkie who loves to write clean HTML/CSS code.
- You are an outstanding designer with a portfolio to back it up.
- You have nagging obsession for finding better and more efficient ways to do things.
- You want to get better at playing Foosball in a highly competitive environment.
- You can work hard with minimal supervision.
- You possess a positive, outgoing personality – we don't hire cavemen.

Responsibilities:

- Create (x) HTML and CSS page/interface layouts from wireframes or graphic prototypes provided.
- Produce A-level work with minimum supervision.
- Work well amongst a diverse team of creative artists, writers and developers.
- Communicate task progress daily with supervisor to assure timely completion.
- Display effective time management skills in reference to project schedules.
- Strong desire and capability to learn new development skills.
- Proficiency with the entire MS Office Suite and Outlook Calendars and Tasks.

Get Started

Please provide a resume and a one-page statement or cover letter indicating your area of interest and how this experience will help you achieve your goals. We hire only the best people in St. Louis. Please tell us why we should hire you. Cubs fans, and resumes without cover letters will not be considered.
